Write better code

On GitHub, lightweight code review tools are built into every pull request. Your team can create review processes that improve the quality of your code and fit neatly into your workflow.

Manage your chaos

On GitHub, project managers and developers coordinate, track, and update their work in one place, so projects stay transparent and on schedule.

Find the right toll

Between applications and custom tools, there's no limit to the ways you can build on GitHub. Fine tune your process as your team changes, update tools as technologies shift, and find new ways to work better.

Built for developers

GitHub is a development platform inspired by the way you work. From opensource to business, you can host and review code, manage projects, and build software alongside 40 million developers.
